Response to Arguments

The Applicant argues that the inclusion of the rewritten limitations of former claim 3 into independent claim 1 render the claim patentable because no prior art was cited to reject former claim 3. However, former claim 3 was rejected under 112 1st paragraph because the claim was indefinite and since there was no definition in the specification as to what "ordinary data" meant there was no way of searching it. However, now that the limitation has been clearly written, it was found in the same reference used in the first action 102. See rejection below.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- Claims 1, 2 and are 4 rejected under 35 U.S.C. 102(e) as being anticipated by Chauvel et al.
 - Claim 1 and 4: A moving picture experts group (MPEG) decoder for producing a caption for display on a screen, said decoder producing a video stream from an externally-applied MPEG stream, the decoder comprising:
 - a video decoder for decoding the video stream and extracting user data from header information of the video stream; See figure 1b item 252

Application/Control Number: 09/484,974

Art Unit: 2613

a header memory for storing the user data; (See Chauvel figures 17B,D,E and F where header data is clearly extracted, storage of the header is inherent.)

a central processing unit (CPU) for producing caption data by decoding the user data and transforming the caption data into on-screen-display (OSD) object data; (See figure 2 item 220, the Arm core is a CPU capable of performing this function.

an OSD controller for transforming the OSD object data into pixel data in response to a predetermined enable signal and outputting the pixel data; and a video mixer for mixing the pixel data with the decoded video data. (See column 41 lines 30-59, please note the mixing function on line 39. In addition an enable signal is inherent, the OSD processor is controlled by the CPU therefore an enable signal is required.)

Wherein the OSD object data is considered data transformed from caption information (See column 11 lines 27-31) when a caption function is performed, and considered data for displaying non caption OSD characters when a non caption function is performed.

(See Chauvel column 11 lines 39-52. The only time the caption data comes from the OSD data buffer is when there is a request for the caption data, otherwise the non

Claim 2. The MPEG decoder of claim 1, wherein the OSD controller comprises:

an OSD buffer for storing the OSD object data received from the CPU; and
an OSD processor for reading the OSD object data from the OSD buffer and transforming
the OSD object data into pixel data. See column 43 lines 33-67. Buffer and memory are
synonymous.

caption data is displayed on the screen.)

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from

the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date

of this final action and the advisory action is not mailed until after the end of the THREE-MONTH

shortened statutory period, then the shortened statutory period will expire on the date the advisory action

is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX

MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Charles E Parsons whose telephone number is 703-305-3862. The examiner can normally

be reached on M-TH 7AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Chris Kelley can be reached on 703-305-4856. The fax phone numbers for the organization where this

application or proceeding is assigned are 703-872-9314 for regular communications and 703-872-9314

for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be

directed to the receptionist whose telephone number is 703-305-4750.
